EDUCATION

University of Texas at Austin, M.S. in Computer Science, *Specializing in AI*, GPA: 3.55 / 4.0 — *Aug 2024* – Dec *2027*
University of Texas Rio Grande Valley, B.S. in Computer Science, GPA: 3.58 / 4.0 — *May 2024*
Relevant Coursework: AI Engineering, Generative AI, Data Structures & Algorithms, Machine Learning, Deep Learning, NLP

TECHNICAL SKILLS

Languages: Python, C++, TypeScript/JavaScript, SQL, HTML/CSS
AI/ML: PyTorch, LangGraph, LangChain, RAG, Embeddings, Vector Search, Pinecone, ChromaDB, pgvector, OpenAI, Claude
Web/Data: Next.js, React, tRPC, PostgreSQL, Redis, Clerk, Firebase, Vercel, Docker, Git/GitHub, Google Colab, Jupyter Notebook

WORK EXPERIENCE

Allied Consulting Group — **Pharr, TX**
Software Engineer | *City Connect* — *Jan 2026 – Sept 2026*

- Built City Connect, a multi-tenant civic AI platform for the City of Pharr, integrating a bilingual LLM assistant and scalable municipal architecture for resident support and future expansion across cities.
- Created the public City Connect branding website, translating MVP goals into clear product messaging around 24/7 resident support, source-cited answers, bilingual access, and one-line website integration for municipal websites.
- Built the Tech Admin Dashboard and hybrid RBAC system, enabling secure multi-city administration through a dedicated /admin route, 5-tier role hierarchy, Postgres-backed memberships, invitation-based onboarding, and Redis-cached permission checks.

IDEA Public Schools — **Weslaco, TX**
Technology Operations / IT Intern — *Mar 2022 – May 2023*

- Supported headquarters technology operations by troubleshooting hardware, peripherals, mobile devices, and network connectivity issues, helping staff maintain productivity during daily operations.
- Worked with the Project Manager on a major mobility transition project, helping migrate 3,000+ staff to a new cellular service provider and supporting a cost-saving initiative projected to save the organization millions annually.

PROJECTS

AI Student Support Platform | *Next.js, TypeScript, LangGraph, tRPC, PostgreSQL, Redis* | GitHub

- Designed and built an AI student support platform for the University of Texas Rio Grande Valley (UTRGV) to help students access campus information through a conversational interface powered by LLMs and retrieval-based workflows.
- Engineered a full-stack architecture using Next.js, TypeScript, tRPC, LangGraph, PostgreSQL, and Redis, supporting persistent conversations, AI-assisted responses, session memory, and scalable backend services.
- Developed an embeddable streaming chat interface and tenant-aware architecture designed to support multiple university departments and higher-education institutions.
- Engaging with UTRGV stakeholders to assess deployment pathways and potential integration of the platform into student-facing services.

Healthcare AI RAG Tutor | *Python, embeddings, vector search* | GitHub | Live Demo

- Built a retrieval-augmented AI tutor designed for medical students that answers healthcare questions with grounded explanations by retrieving top-matching textbook passages via embeddings and vector search before generation (1st Place, Hack Research; 24-hour hackathon, 300+ participants).

AI Code Editor | *Next.js, TypeScript* | GitHub | Live Demo

- Built and deployed a browser-based AI IDE supporting 50+ programming languages, real-time multiplayer editing, and an in-editor LLM assistant, with scalable infrastructure designed for future user adoption.
- Architected production-ready code execution and backend infrastructure using Judge0/node-pty and Vercel serverless functions, with Clerk authentication, Neon Postgres, Upstash rate limiting, and Stripe billing to support secure, scalable user growth.

LEADERSHIP & TEACHING

CodePath — **Remote**
AI Engineering Teaching Assistant / Tech Fellow — *May 2026 – Present*

- Enabled 200+ students to ship AI projects and contribute to open-source repositories across CodePath AI 110 and AI 301, leading Python debugging, GitHub contribution workflows, model integration, and Claude Skills-based automation for repeatable software engineering tasks.

University of Texas Rio Grande Valley — **Edinburg, TX**
Software Engineering Mentor — *Oct 2024 – Dec 2024*

- Mentored a local university student in **React/Next.js** development, software engineering workflows, project organization, and code-quality best practices, contributing to his successful transition into a Software Development Engineer role at IBM.

2x CS II Academic Tutor | Undergraduate Teaching — *Aug 2023 – Dec 2023*

- Led intermediate **C++ CS II PLTL sessions** on algorithms, data structures, debugging, and problem-solving patterns, helping improve overall course performance by 20% compared to previous semesters.

AWARDS & HACKATHONS

CodePath Tech Fellow, Certificate of Leadership in AI Engineering, 2026 [Certificate]
$1K Grand Prize, We R Cooked AI Voice Call Simulation (1K+ participants, 2024) [Post]
1st Place Sustainability, Bin Fiesta Recycling AI Assistant (300+ participants, 2024) [Post]
1st Place AI Healthcare, GPT-4/RAG tutor (300+ participants, 2023) [PDF] [Post 1] [Post 2]
